

# GetContactBirthdays

Last Modified on 11/01/2017 9:50 am CDT

## Overview

Get birthdays for an account based on information sent via an http form post.

## Post Url

<https://hyperdrivepro.morethanrewards.com/api/2/GetContactBirthdays.aspx>

- SSL is required

## Form Fields

Field	Max Length*	Required	Notes
response_type		Yes	Set this field value to <b>json</b> to return results in JSON format
accountid		Yes	<b>Must be numeric.</b> Account ID for this account.
apikey		Yes	API Key for this account.
month	2	Yes	Month for birthdays [A number, 1 through 12]
day	2	Yes	Day of the month (combined with Month to return all birthdays for that Month/Day) [A number, 1 through 31]

## Notes

- The field **contactindex** returned in the results indicates whether the contact is the PRIMARY (1) or SECONDARY (2) contact on the contact record.
- Depending on the contact record, the **birthday** field may return just a month/day **01/08** (January 8th) or a full month/day/year **01/08/2002** (January 8th, 2002)
- **emailaddress** will correlate to the first or secondary contact. (If it's the secondary contact's birthday, their email address will be shown, not the primary email address)

# Sample Results

## Success Message

```
10001
1
Mary
Smith
test@test.com
12/05
```

## Sample Failure Message

```
Authentication failed
