GetContactNotes

Overview

Get notes for a specified contact via an http form post.

Post Url

https://hyperdrivepro.morethanrewards.com/api/2/GetContactNotes.aspx

- SSL is required

Important Note

Submitting a blank field will result in clearing the data for that field out of the database. If you don't want to change a field, do not submit it with the form.

Note dates are in US Central Standard Time

notecontent is wrapped in a CDATA tag. This allows special characters to reside in an XML document without hurting the integrity of the XML.

Form Fields

Field	Max Length*	Required	Notes
response_type		Yes	Set this field value to **json** to return results in JSON format
accountid		Yes	**Must be numeric.** Account ID for this account.
apikey		Yes	API Key for this account.
identifymethod	1	Yes	Values:**1** : By contactid (It's recommended that you use this method and store our contactid in your system) **2** : By primary email on file. If there are multiple matches for the email address, we will choose the first one (by add date)

			3: By email or other email on file. If there are multiple matches for the email address, we will choose the first one (by add date)
identifyvalue	75	Yes	Value changes based on **indentifymethod**. Must be integer if contactid, otherwise must be an email address on file

* An error will not result if Max Length is exceeded. Data will be trimmed to this length.
