Get My Dealer List

Last Modified on 08/31/2018 6:42 pm CDT

Overview

Returns a list of dealers and their Rider Rewards API keys and ids, which you'll need when uploading data to us. You can also lookup a single dealer's API settings based on your store identifier (PartnerStoreID). Every time we "on board" a new customer that you're authorized to sync, you will provide an identifier which we'll store in our system for you (PartnerStoreID). Then you'll be able to lookup data based on your store identifier or get a list of all stores, and their corresponding Rider Rewards API Keys.
